

Pouch film is two films put together and sealed by heat. Insert the document which you want to laminate in the pouch film and insert it into the machine, and you get a beautiful and durable document quickly and easily.

There is pouch film from card size up to A2 size, according to the object to be laminated. Moreover different size and shapes of pouch film can be made-to-order. Card Protection Leaf (CP Leaf) is a registered brand.

CP LEAF (Laminating Pouch Films) Pouch Film for general purpose

CP-LEAF glossy Most popular for the general use.

CP-LEAF matt/matt Can write on the pouch film with pencils also.

Exclusive Products

Pouch Film Antistatic Static electricity is subdued.

UV Cut The ultraviolet rays is cut for protection from discoloration.

Magic Can be removed after lamination .

Express (long side seal) Saves lamination time.

Filing Ideal for filing documents .

ROLL FILM consists of 2 rolls of film that are laminated together with a roll laminator. There is a wide variety of rolls up to 1,350mm (54" size). It is ideal for large sized applications. The lamination of one piece with roll laminator is more cost effective than with pouch laminator.

CP Roll is a registered brand.
